

Hercules™ TMS570 Microcontrollers

Flash options from 256 KB to 4 MB and performance from 80 MHz to 300 MHz

The Hercules TMS570 MCU family enables customers to easily develop safety-critical products for transportation and automotive applications. TMS570 devices are part of SafeTI™ design packages and are developed to meet the requirements of the ISO 26262 ASIL-D and IEC 61508 SIL-3 safety standards and qualified to the AEC-Q100 automotive specification. The TMS570 ARM® Cortex®-R based family offers several options of performance, memory, peripherals for motor control and a variety of communication interfaces. The TMS570 family includes options with ARM Cortex-R4 and ARM Cortex-R5 cores. Lockstep CPU architecture, hardware BIST, MPU, ECC and on-chip clock and voltage monitoring are some of the key functional safety features available to meet the needs of automotive, railway and aerospace applications.

For additional information, please visit www.ti.com/tms570 or www.ti.com/safeti

TMDX570LS12HDK – TMS570LS12x/11x Development Kit
TMDX570LS04HDK – TMS570LS04x/03x Development Kit
TMDX570LC43HDK – TMS570LC43x Development Kit

Motor control

DRV8301-LS31-KIT – TMS570LS31x/21x Motor Control Kit
DRV8301-LS12-KIT – TMS570LS12x/11x Motor Control Kit
TMDX570LS31CNCD – TMS570LS31x/21x Control Card
TMDX570LS12CNCD – TMS570LS12x/11x Control Card

Development software

Integrated development environment

Compilers and debuggers:

- TI Code Composer Studio™ IDE
- Green Hills MULTI®
- IAR Workbench®
- KEIL™ µVision®

TI MotorWare™ software for TMS570

- Field oriented / vector control (FOC)
- Sensorless InstaSPIN™-BLDC
- Speed and torque control loops
- TI MotorWare and HALCoGen conventions
- Leverages ARM® CMSIS Math Library

Safety-certifiable RTOS and AutoSAR

Micrium

SCIOPTA

TTTech

Real-time operating system support:

- SAFERTOS®: High Integrity Systems
- µC/OS II/III™: Micrium
- SCIOPTA RTOS: SCIOPTA

AUTO SAR

AutoSAR RTE and MCAL support:

- Vector MICROSAR Safe
- Safe AutoSAR from TTTech/Vector
- AutoSAR: ElektroBit tresos
- MCAL 4.0 from TI

GUI-based code generation tools

HALCoGen

- GUI to configure peripherals, interrupts, clocks, and other µC parameters
- Generates device init and peripheral drivers
- Import into CCStudio, IAR and KEIL IDEs

HET IDE

- Graphical programming environment
- Output simulation tool
- Generates CCStudio-ready software
- Includes functional examples from TI

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
